

Sasanka Gallage

Full-Stack Web Developer

sgallage0000@gmail.com — +94 718559933 — Mattegoda, Sri Lanka
github.com/sgallage — linkedin.com/in/sasanka-gallage — sigallage.me

Education

BSc (Hons) in Computer Science Informatics Institute of Technology, Colombo	2024–2028
GCE A/L – Physical Science Musaeus College, Colombo — 3C's Selected for BSc in Physical Sciences - University of Ruhuna	2022

Experience

Full-Stack Developer Intern, Infinity AI	Oct 2025 – Apr 2026 (Remote)
- Contributing to the development of InfinityOS by working on both frontend and backend integration. - Developing and maintaining frontend features using React, focusing on reusable components and clean UI architecture. - Integrating frontend components with backend APIs to ensure smooth data flow and system reliability.	

Technical Skills

Languages:	HTML, CSS, JavaScript (ES6+), Python, SQL
Frameworks:	React, Next, Express, Node.js, Tailwind CSS
Databases:	PostgreSQL, MongoDB
Tools/Deployment:	Git/GitHub, Vercel, Railway, Auth0, VS Code, PyCharm, AWS

Projects

CeylonRoam — AI Travel Planner
React, Node.js, Express.js, FastAPI, Google Maps APIs, Docker, AWS, Vercel

- Built a full-stack platform to generate itineraries and plan multi-stop trips with optimized route flow.
- Implemented a route-optimization microservice using distance/time matrices from Google Maps APIs to minimize travel time.
- Containerized backend services with Docker and deployed on AWS ECS/Fargate, using ECR for image storage and CloudWatch for logging/monitoring.
- Automated AWS provisioning and deployments with scripts for task definitions and service creation, enabling repeatable microservice releases.

GainsLog — Fitness Tracker

React, Node.js, Express.js, MongoDB, Auth0, OpenAI GPT-3.5-Turbo

- Built a platform for users to log workouts, track nutrition, and manage personalized fitness profiles.
- Integrated Auth0 authentication with protected routes and secure API endpoints.
- Implemented AI-powered workout and recipe recommendations using GPT-3.5-Turbo.
- Developed a clean, responsive UI with workout history, nutrition insights, and real-time updates.

Mini Job Board

Next.js, Tailwind CSS, Node.js, Express.js, PostgreSQL, Prisma, JWT

- Built a complete job board with public job listings, admin dashboard, and secure JWT authentication.
- Developed full-stack CRUD functionality for job posts using Prisma and PostgreSQL.
- Designed a modern, mobile-responsive UI with Tailwind CSS and smooth animations.
- Implemented protected admin routes, input validation, and server-side filtering for efficient job discovery.

MailSweeper — Email Management

React, Node.js, Express.js, Gmail API, OAuth 2.0, Railway, Vercel

- Created an advanced email cleanup tool connecting to Gmail via OAuth 2.0.
 - Implemented sender-based filtering, multi-criteria search, and batch email deletion.
 - Developed intuitive UI with preview panels, bulk selection, and real-time status indicators.
 - Deployed backend on Railway and frontend on Vercel with full CORS handling.
-

Certifications

- Microsoft AI 900 Fundamentals
 - Postman API Student Fundamentals (Jan 2025)
 - Python GUI Development with Tkinter (May 2025)
 - Certificate of participation - Innovate with Ballerina Coding Challenge
-

Leadership & Activities

- Led 6-member team — Software Development Group Project (2025 - 2026)
 - Team Leader — MoraXtream 9.0 Hackathon (2024)
 - Led 4-member team — Web Design & Development project (2024)
 - Member — IEEE Student Branch of IIT (2024–Present)
